Product manufactured under a quality management system certified to ISO 9001/2000 by AFAQ

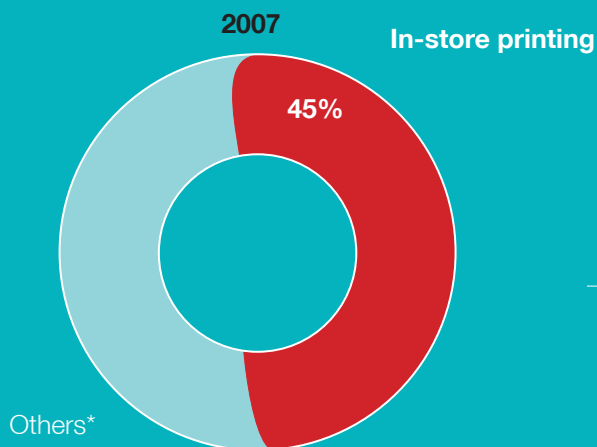

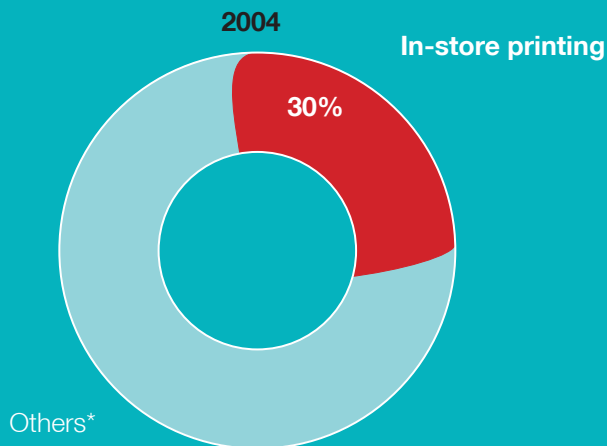

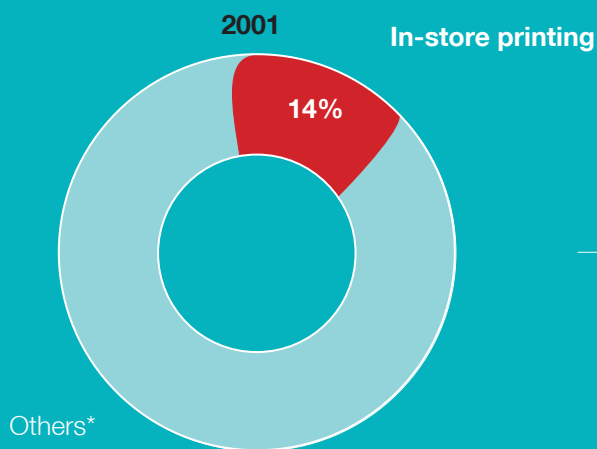

○ Do you need to change your perspective on digital?

What the future holds . . .

Where are photos printed . . .

Source : PMA Survey 2005

Let's face facts!

Are digital photos actually being printed?

Yes, the trend is being set.

In 2005, 39% of digital images were printed. By 2007, this will increase to 46%. Consequently, more digital images are printed in-store or at home.

Is the volume of digital prints going to continue to increase?

According to PMA Research Institute, the number of digital prints will compensate for the decrease in traditional film volumes.

The photographic printing market will **begin to raise again from the beginning of 2007.**

What is the future of in-store printing?

Minilab owners are evolving the fastest: +136% between 2005 and 2006. PMA Research estimates this sector will be market leader with 45% market share at the beginning of 2007.

paper in minutes.

DKS Generation 3

Viewing digital from a new perspective

With its new range DKS Generation 3, KIS / Photo-Me clearly leads the way to digital success. Benefit from the unique vision of a major photofinishing player by adopting an offer of new services, connectivity and unbeaten autonomy.

Open your eyes wide: you have the chance to really grow!

DKS Generation 3

Robustness and support

Long term investment for the future ahead . . .

100% Reliability

Strength of construction

Manufactured to the highest industrial standards:

- ISO 9001-2000
- ISO 14001
- Six Sigma

Simply built for maximum reliability.

100% Service

PC Anywhere*

Deferred technical support.
Important time saving for operator.

Live Update*

Profit in real time from the latest software updates.

Download and install new value-added functionalities, new contents as well as frames, calendars, greeting cards, album templates and more.

A visionary brand

Achieving our ambitions

KIS Photo-Me Group invests nearly **10% of its turnover** in R&D at its Headquarter located in the heart of the «French Silicon Valley» of Grenoble, world research centre in micro electronics and nanotechnologies.

Our engineers manage the development of image processing, optical and data transfer.

These facilities have enabled KIS to obtain a number of patents and to consistently provide its customers with **the most innovative products on the market.**

A strong group

Today, more than **6 out of 10 photos** worldwide are printed on Photo-Me International Group machines: industrial labs, minilabs, booths or self-service kiosks.

Benefiting from a stable financial status, KIS **easily** distributes its professional solutions worldwide.

A photographic quality always rewarded.

The MSB technology was awarded the **DIMA 1st prize** in the last 4 years.

*Availability according to countries

The essential guide to business success in 9 steps ...

1
Reliability

Request a secure process.

2
Photo quality

Make demanding customers
loyal customers.

3
Compact

Devote more space to
customers and sales.

4
Productivity

Be more reactive - it's the
key to your success.

5
Simplicity

Save time and maximize
profits.

6
Automation

Take care of your customers,
the DKS does the rest.

7
High capacity

Less frequent replenishment
of consumables.

8
Versatility

To give you the power to
always say «yes».

9
Connectivity

Reach potential
customers wherever
they are.

DKS Generation 3

A 100% efficient solution . . .
