

AUTOMECHANIKA 2010

2010 is a year with many positive changes for **HPA-FAIP**. The company of the *NEXION Group* completed the move into the new highly automated factory of Prato (January 2010) and will exhibit at the *Frankfurt show* many new proposals in all product ranges.

WHEEL ALIGNMENT

Beside the top of the range with the *3-Dimensional* technology *C 1000* and the two Radio aligners *C 400* and *C 500*, **HPA-FAIP** introduce now new **C 200**, an entry level Radio-CCD wireless wheel aligner extremely versatile in the functions and smart technical solutions.

The price positioning is very interesting and many features belong to machines of upper class: *C 200* has got an integrated connection with **Cal One-Touch**, an advanced electronic device to calibrate the steering angle sensor and latest vehicle safety and checking systems like *ESP*.

C 200 can be also connected to any internet access for software or data bank upgrade on line through our "*Aligner OnLine*" service.

WHEEL BALANCERS

Technical re-styling for high-of-the-range wheel balancers of the *B-Series*.

B 340 Evo and **B 240 Evo** can be seen for the first time at the *Automechanika 2010*, both in standard and with the new designed *ELD (Electronic Locking)* version.

First show-down also for the new **B 325**, a compact, medium sized wheel balancer with LCD monitor, equipped with a complete suite of programs and extra features like automatic search of the unbalance position, "*Hidden Weight*" and "*Control Weight*" functions.

TYRE CHANGERS

At the *Automechanika HPA-FAIP* show up a dedicated corner of "LEVER-LESS solutions".

Together with the successful top machine *M 928 ROYAL* (2007), *HPA-FAIP* introduce here the "LEVER-LESS technology" on traditional tyre changers.

M 824 LL has a traditional bead-breaking and turntable, up to 24" rim diameter, it comes from factory with right-handed helper and it is equipped with the *HPA-FAIP* well-known "LEVER-LESS" device.

This machine looks extremely solid, ideal for tyremen who like the traditional way and work intensively with sport and low profile tyres as well as every type of *RFT*.

M 824 LL is the first step of the traditional tyre changers towards the "LEVER-LESS technology": an excellent synthesis of tradition and modernity.

New BRAVO LINE

HPA-FAIP introduce for the first time the *entry level* package tyre changer+wheel balancer made in its factory in *Sozhou, China*. Both products are meant to entry level shops or garages where tyres are a side-business, but nonetheless good performances are requested as well as product reliability.

HPA-FAIP offer its experience not only to professionals, but also to this growing market segment.

This first package is including **M 42**, a proper automatic tyre changer with 22" turntable suitable for tyres up to 14" wide; **B 40**, a wheel balancer with electronic pc board *Made in Europe* and equipped with a full set of operating programs (*Static, Dynamic, Alu, Motorbike, Hidden Weight*).

Also available for overseas markets **M 41**, a flag-arm with air tank integrated in the column.

LIFTING EQUIPMENT

HPA-FAIP take advantage of both increased production capacity of the new factory in Prato and the recent acquisition made by *Nexion Group* and is now able to enlarge its offer of lifting equipment.

A new range of models and versions is available like 2-4 post lifts both electro-hydraulic and electro-mechanic, under-body and under-wheel scissor lifts from 3 to 6 tons.

All products are developed and *manufactured in Italy*, comply with *CE Standards* and come out with an interesting price positioning.

A/C SERVICE EQUIPMENT

The last *HPA-FAIP* creation to increase the business of garages and tyre shops is **ARTIK 500**, the air-conditioning re-charge station with diagnostic functions.

The machine is very simple, complete with all advances functions (like vehicle data bank, hybrid function, vacuum and the very important Micro-Leak Test, automatic refill and charging) and basically independent; so the operator is free to attend other jobs while the machine is working.
