## **Hurricane™** Automatic CD/DVD Duplicator

ADR's Hurricane is the best solution for you when it comes to fast, efficient, and trouble free duplication. Our smallest unit is equipped with one CD or DVD writer. The Hurricane system can be upgraded step by step up to six writers plus printer or up to ten writers without printer. Its compact design fits in any office/home environment. With the Hurricane you can write and print CD/DVDs fully automatically.

### **About the system**

With its patented disc picker and the high quality robotic the HURRICANE became one of the most reliable duplicators in the whole industry. The long time durability of the machine allows the user to run the system around the clock, seven days a week. This makes the ADR Duplicator the first choice when it comes to "on-demand" production of CDs and DVDs.

### **Printing solutions**

We offer a wide range of printing solutions for our duplicators. Next to the common InkJet technology we also offer Thermaltransfer- and Microdry printers for the HURRICANE models. Depending on your needs we can offer you the fitting solution.

### **Flexibility**

With the ADR-Module-System you stay flexible in the future. You can always upgrade your machine with up to ten CD/DVD writers. Further you have the possibility to change the printer whenever a new version is available or you decide to use another printing technology.

This way your system is growing with you and you protect your investment.
