

METEOR DP40 PRO®

Flexibility

1 Large Capacity Pneumatic Loader

- The loader has a capacity of up to 2500 sheets and can handle formats up to 311 x 457mm (12.50" x 18"), using an air feed system allowing for the vacuum insertion of Paper substrates up to 300 gsm (Bristol, Matte, Linen, Glossy, Art, Coated, Uncoated, Kromecoat, Chromolux®, Bond, Adhesive Labels...) and Plastic substrates up to 320 Microns (12 MILS) on PVC, Polycarbonate, Polyester, Vinyl, Teslin®.... Automatic duplexing from Trays and Loader included.

Superior Registration

2 Real Offset Feeder Table

Technology resulting from Offset printing allows for high precision sheet adjustments, virtually eliminating skew and registration issues during printing. Achieve +/- 0.2 mm registration.

Productivity

3 Feed Via Multi-Format Trays

- Feed via multi-format trays (A6, A4, A3+) paper substrates ranging from 70 gsm to 300 gsm (170 lb. Index - 110 lb. Cover).

- Maximum tray & Pneumatic loader combined capacity of 5,750 sheets.

4 Automatic Duplexing Up to 200 Gsm

Automatic duplexing is available on all feeding options for paper up to 200 gsm (20 lb. Bond - 94 lb. Cover).

5 2400 Dpi Scanner

600 DPI scanner with integrated calibration allowing for the reproduction of documents on formats up to A3+.

METEOR DP40 PRO®

Faster...
MGI's New Multi
for all your Paper Applications

The **METEOR DP40 PRO®** meets all your current requirements for flexibility and cost effectiveness

This is the **new generation of professional digital presses** that conciliates the expectations of productivity, quality, cost-effectiveness, flexibility and reliability required for the graphic industry.

Expand your scope of applications thanks to the variety of paper substrates the Meteor DP 40 can accommodate.

The use of the most varied paper substrates, **up to 300 gsm – 170 Lb. Index - 110 Lb Cover: Bristol, Matte, Glossy, CS1-CS2, Kromecoat, Linen, Art-Textured, and Adhesive Labels** now offers you new application opportunities that translate to higher sales and profitability.

Leaflets, Brochures, Advertising documents, Business cards, Stationery and much more... you no longer sell simple color printing but **sophisticated documents with full Variable Data and Personalization.** Create real added value that translates directly into sales.

METEOR DP40 PRO® the Power of Personalization and Variable Data Management!

The possibility of personalizing On-Demand printing is revolutionizing the printing industry

Thanks to the **METEOR DP40 PRO®**, be pro-active and cost-effective, when managing the Variable Data for short and medium print runs for your customers.

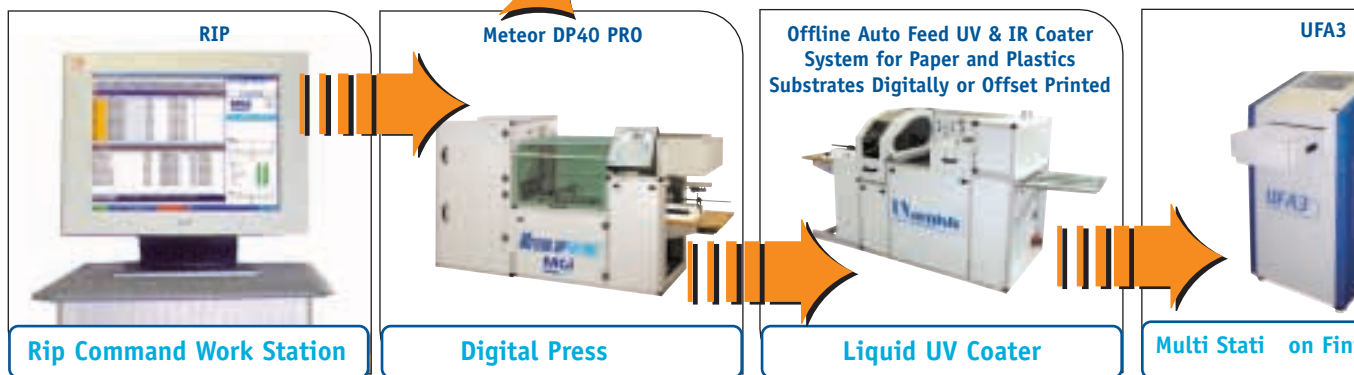

Target your customers personally and individually.

By personalizing printing, you allow your customers to address their targets and to communicate personalized information. Imagine: Personalized advertising documents, Automatic numbering, Bar codes, Alpha-numeric databases and photos on virtually any paper substrate of your choice.

Paper printing today: A rapidly changing market that demands:

- **Substrate flexibility**, both with respect to quality, diversity and thickness.
- **Faster than ever**, the Meteor DP40 will provide you up to 2100 A4/Letter pages in 4-Color process and up to 2700 A4/Letter in Monochrome per hour.
- **Autocalibration of Colors** by use of an integrated densitometer for color consistency during production runs and re-printing.
- **Automatic duplexing** is available on all feeding options for paper up to 260 gsm (20 lb. Bond - 94 lb Cover).

.. Flexible... Versatile...

Multi Substrate Digital 4-Color Printing Press

METEOR DP40 PRO®

Someone Finally

The Digital Printing Revolution

The only digital press that allows the transfer of paper print technology to plastic media

METEOR DP40 PRO® breaks away from the current market by allowing printing on plastic with virtually the same quality as digital printing on paper. It allows you to Personalize and manage Variable Data simultaneously while printing on plastic substrates.

The competitive advantages of digital printing on plastic.

Innovation, creativity, versatility, added value, **profitable** growth factor.

Resistant, tear-proof, and unalterable, printing on plastic opens up new applications, **opportunities and profitability options for you.**

METEOR DP40 PRO® a few highlights:

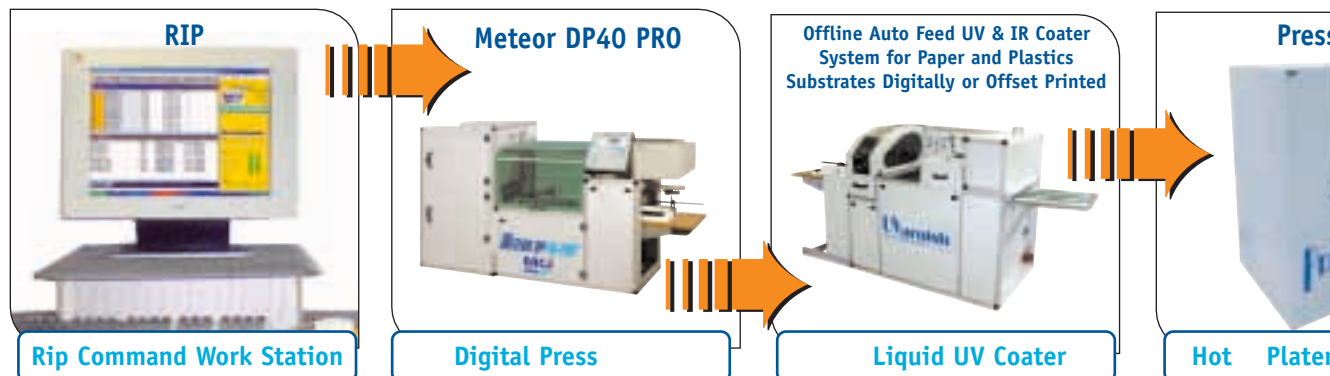

- Up to 1050 PVC sheets A3+ Per hour (12.25" x 18")
- Standard Plastic Substrates from 210 Microns to 320 Microns.
- Up to 21,000+ PVC cards (21 up) Per hour – 4-Color (CR-80 credit card ISO format)
- Lower production cost than traditional print technologies, ease of operation and virtually no make-ready time.

Variable Data Management

From Black & White To 4-Color

- Overprinting
- Automatic Numbering
- Bar Codes
- Photos- ID Pictures
- Databases

Join the revolution in digital printing on plastic substrates for more flexibility and profitability than with traditional printing.

Paper Finishing

MGI's Complete Line of Finishing, Coating for your Paper Applications

The New UV Liquid Coating
Digital or Offset

"MGI Digital Graphic Technology is now introducing the **offline UV & Infrared Uvarnish** to complement its line of 4-Color digital presses and Finishing solutions for **Paper and Plastic substrates**.

The first and only "Push Button" UV coater available in the market.

User-friendly and with the smallest foot print, **the Uvarnish** was designed to compliment both **digital and offset printed paper or plastic substrates** (Paper coated and sealed plastic surfaces like PVC,PET etc..) without requiring a fulltime operator or a large amount of floor space.

The Uvarnish is also the first UV coater system to protect your digital press investment with an "Automated Recovery System" that ensures personalized VDP sheets are not at risk. Friendly to the environment, the Uvarnish is also using a UV curing technology that is **ozone free**.

Depending on the type of substrates and applications, various varnish finishes are available : Matte, Glossy and Pre lamination varnish for plastic hot platen lamination.

Technical Specifications

Substrate s :

Papers :
Coated Papers Glossy and Matte.
Plastics :
PVC, PET ...

UV Lamps :

UV Lamps 4kW mercury
Ozone Free, Width 360mm
(14.17")

UV liquid ink available :

Glossy and Matte.

In Line Infrared Dryer :

Power: 2500 w

Large capacity pneumatic Feeder :

- Automatic Feeder,
- Double feed detection system,
- Jogging Table

Paper Format :

360mm x 520mm (maximum)
14.2"x20.5"
140mm x 290mm (minimum)
5.5"x11.4"

Substrate Thickness :

150 Gsm/55 Lb. Cover (minimum)
500 Gsm/180 Lb. Cover
(maximum).

Production :

Up to 2400 sheets 360x520mm
per hour [14.2" x 20.5" P/H]

Electrical power :

208-240 V, 3 PHS +N+G,60Hz.
400V 3P+N+T, 50/60Hz, 18kW.

Weight :

About 360 kg/792 Lbs

Dimensions :

WxHxD :
3600mm x 1230mm x 730mm.
142" x 49" x 29"

Printing, Converting & Die Cutting Solutions for Various Applications

Liquid Coating Production Process Digital or Offset

From A4/Letter to 13" x 19"
(330 x 482.6 mm)

MGI offers you a complete solution, from printing through finishing. With the UFA3 Multi Function Paper Finishing Station, you can offer an additional service without using an outside vendor, shorten your turnaround times and increase your margins. The UFA3 is a standalone, complementary unit designed specifically with your current print solutions in mind.

Thanks to its interchangeable, modular tools, the UFA3 integrates easily into your production line. Because of its ease of use and simplified settings, it is the ideal user-friendly finishing tool. Its modular tools provide horizontal cutting, vertical slitting, scoring, creasing and perforation in one easy pass.

Technical Specifications

The UFA3 Multi Function Paper Finishing Station is equipped with (standard):

- Automatic up to 1,000 Sheet Feeder (94 lb. Cover) - 250 Gsm
- Automatic (adjustable) Recovery Tray for Converted Formats
- Converting Setting Software, and Pre-programmed Templates
- Paper Chutes Separation and Emptying
- 8 boxes for Toolholders for the Cutting, Scoring or Perforation Tools
- Manual Adjustment of Toolholder Position
- Vertical Pressure Cut w/wo gutters
- Horizontal Shearing Cut w/wo gutters
- Automatic Setting of Cut Height Following Template Validation via Software (Top Cut)
- Vertical Scoring with a Scoring Tool
- Horizontal Creasing & Scoring
- Vertical Perforation
- Precision Vertical Forwarding (Cutting, Scoring, Perforation): $\pm 0.02''$ (± 0.5 mm)
- Precision Horizontal Cuts: $\pm 0.02''$ (± 0.5 mm) on 250 Gsm Paper for Cutting 21 Business Cards up to 13" x 19" (330 x 482.6 mm).

Paper Feed:

- Max. size: 13" x 19" (330 x 482.6 mm)
- Min. size: 6.5" x 7.5" (170 x 190 mm)
- 1000 sheets capacity feeder

Dimensions & Weight:

W 650 mm (25.6") x D 850 mm (61") x H 1320 mm (52")

Electrical consumption:

220V - 240V VAC $\pm 10\%$, 50HZ --> 500VA, 2.3A MAX
100V - 120V VAC $\pm 10\%$, 50HZ-60HZ --> 500VA, 5A MAX

Cutting speeds (approximately):

- 1000 ISO Cards (3.3" x 2.16") in ± 12 minutes
- 1000 Business Cards (3.5" x 2") in ± 12 minutes
- 400 Scored A4 Folders in ± 1 Hour with Full Bleed Edges

The New Plastic Card Production Process

"From Mass Production to Mass Personalization"

PunchCardPro[®]
by M.G.I.

PUNCHCARD PRO[®] is a stand-alone automatic hydraulic finishing unit for plastic cards. PunchCardPro[®] cuts out each sheet into 21 or 24 cards of ISO CR-80 (85.5 x 54mm) format with rounded corners and thickness of up to 0.85 mm or .34 mils (850 μ). Reading crop marks using integrated fiber optics ensures precision die cutting of the cards. The cards are automatically retrieved in the chimney stackers (3 x 180 cards). Teslin[®] Die option also available.

(8000 to 9000 cards per hour)

PLASTIC CARD : THE ISO CR-80 CARD

- 1 Clear PVC Overlay
- 1 PVC standard printed
- 1 Spacer or RFID layer for contact-less cards

- 1 PVC standard
- 1 Clear PVC Overlay with or without Magnetic Stripe (HICO or LOCO)

Plastic Card from 300 up to 850 μ.

Technical Specifications

30.7" x 26.4" x 46.5"

KNOW-HOW

From printing to finishing, MGI provides market needs, helping you stay on the

As a world leader in digital printing and finishing, MGI Digital Graphic Technology has provided innovative and value added solutions to the graphic industry for the past 25 years.

Founded in 1982 as a public corporation, MGI Digital Graphic Technology is now listed on the Paris Stock Exchange.

As a major international player in the digital graphic industry, MGI has been offering a vast and innovative array of solutions for the past quarter century.

MGI Digital Graphic Technology : a global presence in over 40 countries.

- **France** : Regional branches in Lille, for the North, Lyon for the East and South East, Toulouse and Montpellier for the South West, and Rennes for the North West region.
- **Some key International Presence :**
 - Europe: UK, Germany, Belgium, Luxembourg, Holland, Spain, Portugal, Greece, Russia, Middle East, Africa.
 - Americas : USA, Canada, Brazil, Mexico, Argentina, Chile, Ecuador, Bolivia, Peru, Caribbean...
 - Asia-Pacific: Japan, India, Australia, and Malaysia

- France
- USA / Canada / Américas / Asia / Pacific
- Europe / Middle East / Africa

Cutting edge technology combined with innovative and dynamic staff is the driving force behind MGI's strategic business deployment. MGI Digital Graphic Technology is one of the highest performing companies within its activity segment.

MGI is a member of several International associations :

MGI is respectful of the environment and strives to promote environment friendly technologies and solutions. MGI is an active member of the plastic card (end of life and obsolete cards) recycling program.

es competitive solutions for all of your e cutting edge of today's technology ...

MGI core values :

Combinations of focused and creative workforce enable MGI to stay at the forefront of the Graphic Industry.

With an annual investment of close to 15% of sales back into R&D, **MGI Digital Graphic Technology** maintains its goal of providing graphics professionals with **new flexible and profitable solutions**.

MGI's R&D: Bridging know-how and market expectations...

MGI's R&D center blends engineering performance in electronics, IT, micro-mechanics, and colorimetry, all while keeping in touch with new market demands and trends. This constant technological analysis leads to newer technology being rapidly integrated within the new solutions in order to provide the graphic professionals, with **quality, flexibility and profitability** in the competitive graphic world.

MGI's line of products is backed by reliable and proven technologies, designed to answer our clientele's high expectations.

MGI Digital Graphic Technology strives to integrate environmentally friendly solutions into its design and manufacturing processes, using technologies such as the **Ozone Free lamps** and promote **active recycling programs** for obsolete plastic cards.

Services offered by MGI Digital Graphic Technology :

MGI staff experts are dedicated to our customers and our proactive approach is the key to our success.

As we are connected to our clients by a true partnership, our expert staff and global distribution network will help our clients with a smooth and seamless integration of our solutions.

Our website www.mgi-usa.com is designed to provide our clients with all the tools they need to maximize the performance of the MGI solutions, including everything from access of technical information, operating manuals, pilot programs, etc...

MGI's ability to bridge the **Digital and Offset Technologies** offers a unique flexibility and performance.

Automatic duplex up to 260 gsm - 96 lb Cover

Maximum Print Format :
305 mm x 440 mm (12"x17.3")

Substrates :

PAPER:

Wide range of paper substrates from 70 Gsm up to 300 Gsm - 18 Lb. Bond up to 170 Lb. Index - 110 Lb Cover (Bristol, Matte, Coated, Kromecoat®, Vergé®, Art, Bond, Adhesive Labels...)

PLASTICS: From 210 Microns to 320 Microns PVC (Coated or Uncoated), Polyester, Polycarbonate, Lexan®, P.E.T., Vinyl, Synthetic Papers (Teslin®, Melinex®, Artisyn® ...)

Feedboard — Offset feeder :

- > High adjustment precision (± 0.2 mm)
- > Ultrasound double feed detection system

Printing Output :

- > Extraction of printed sheets via micro-conveyor belt
- > Jogging table receives printing documents.

Automatic Duplexing :

From all Trays :

Min Format: 139.7 x 176 mm, (5.5" x 6.9")
Max Format: 320 x 457 mm (12.25" x 18")
From 70 up to 150 Gsm plain mod.
From 151 up to 200 Gsm thick mod 2.

Paper & Plastic Substrate Management:

1 large capacity loader and 3 Input Trays.

Large-Capacity Loader

Up to 300 Gsm-170 Lb Index-110 lb Cover. Air Feed System.

Capacity : up to 2400 sheets.

Input Tray No. 1 :

From **70 Gsm up to 260 Gsm** (18Lb. Bond to 96 lb Cover). Maximum capacity 500 sheets. Accepts formats from 90 x 140 mm up to 311 x 457 mm A4, Letter, Legal, 8,5"1/2x14", Executive, 8"x10", 11"x17", 12"1,5/2x18", A3 + Wide

Input Tray No. 2 :

From **70 Gsm up to 260 Gsm** (18Lb. Bond to 96 lb Cover). Maximum capacity 500 sheets. Accepts formats from standard A5 up to A3, and from 8,5"1/2x11" up to 11"x17".

Input Tray No. 3 :

From **70 Gsm up to 260 Gsm** (18Lb. Bond to 96 lb Cover). Maximum capacity 2500 A4 sheets.

Scanner (integrated) :

Resolution: 2400 DPI.
Speed : Up to 38 ppm A4/Min

Optional :

Auto document feeder for Scanner, from 70 up to 200 Gsm (20 Lb Bond to 95 Lb Cover)
Format A5 up to A3 wide (311 x 457 mm - 121/2" x 18")
Capacity: 100 sheets.

Electrical Power :

220/240 V model: 220/240 VAC ± 10%; 50/60 Hz ± 3%
Consumption: 2,500 W maximum, 12 Amps

Air Supply: Rotary Vane (Option) Vacuum Pumps - Oil Free - Air Coded

Suction air rate (Vacuum) 25 m³/hour - Motor capacity installed 1420 ^{mm} - Noise level (62 dba) - weight 26 Kg

Environmental Characteristics :

Required operating environment :

10° to 30° C (50°F to 86°F) max variation to 10°C per hour
Relative Humidity level during operation: 30% to 60% RH

Regulations / Safety Standards :

UL, cUL, FCC-B, DOC, VCCI, EC Marking, C-Tick, CDRH, GOST

Mac and PC Compatible :

All PAO CMYK or RGB applications :
X-Press, Illustrator, PhotoShop, Corel Draw, InDesign etc...

All GDI RGB applications :

Microsoft Word, Excel, Adobe Acrobat, Publisher, etc...

Specific Technical Characteristics :

Footprint (with feedboard) :
3000 mm x 1290 mm x 1000 mm (W x H x D)
118.11" x 50.8" x 39.4" (W x H x D)
