New version launch

New
Axeda Supervisor 9.0

Save time and control costs with Wizcon®

The new version of Axeda Supervisor™ with Wizcon 9.0 has been enhanced with features* to increase developer productivity, expand connectivity, and improve platform performance.

- Optimize data exchange and response time with your PLCs:
    - New WizPLC based on the 3S CoDeSys interface
- Increase developer productivity:
    - Automated tag creation with new "Tag Generator"
    - Image indexing
- Leverage new technologies, with support of:
    - Hyperthreading and multiprocessor
    - Windows 2003 Server
- Expand connectivity:
    - BACnet: hundreds of devices connected in a few mouse-clicks
    - OPC: AE client, DA client/server, and HDA client/server interfaces
- Improve customer satisfaction, via 4th generation Web technology:
    - Enhanced Wizcon Studio GUI
    - More web functionality
    - Increased web performance

————— Collect, Control, Communicate!

Optimize your SCADA via remote management

With the new version 9.0 of the Axeda Supervisor suite, Axeda also launches new web services: the Axeda Hosted Services** in ASP mode. Easy to use with just a few mouse-clicks on any browser, Axeda's Hosted Services enable you to control, manage, and backup your application data quickly, safely, and in real time.

- Axeda Collaborate Service℠
    - Remotely access and share applications to offer proactive support in real time.
- Axeda Trace Service℠
    - Centralize data on a secure, remote server for regulatory compliance, as well as transversal analysis and reporting.

————— Support, Analyze, Report!

*To discover these new features through training sessions and learn about license upgrade conditions, contact your Axeda representative.
**For information on Axeda's web services in ASP mode, please consult the separate flyer entitled "Axeda Hosted Services".
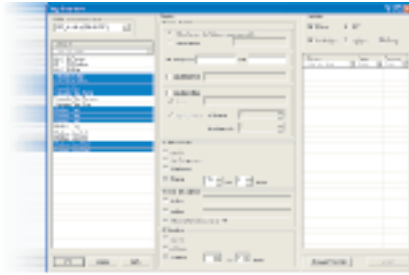

Some of the new features in Wizcon 9.0

Tag Generator

WizPLC
Soft Logic IEC 61131-3
Interoperability 6 PLC languages

Network Application Update

Wizcon Web Interface
Multi-image visualisation
Web-based HMI

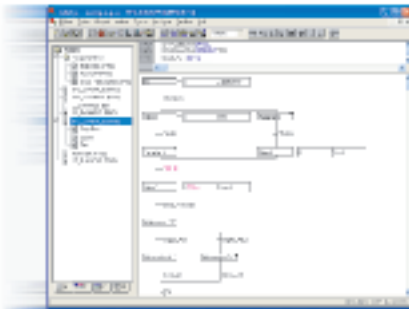

Hosted Services : Traceability,
Remote collaborative support

New Tag Generator
Using the brand new Tag Generator, you can "map & merge" real tags to dummy Wizcon tags using easy drag & drop technology. Key benefits:
 - Greatly decrease development time
 - Simplify entering OPC and BACnet PLC adresses
 - Easily integrate all drivers that support browsing.

New BACnet communication driver (option)
 - Full integration of BACnet (vendor-independent, standard technology)
 - Upload, modification and download of time-based schedules for all BACnet devices with any of over 180 BACnet-compliant manufacturers
 - Full remote control of BACnet network and devices
 - Great PICS: Axeda offers a very high level of BACnet compatibility, thanks to a superior Protocol Implementation Compliance Statement, your guarantee for interoperability with a larger number of PLCs.
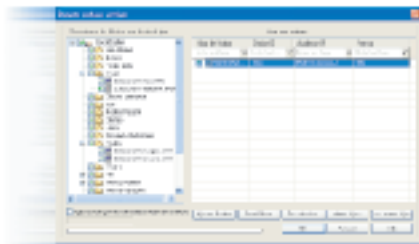

Hyperthreading and Multiprocessor support
 - Direct support of processor hyperthreading and multiprocessor computers
 - Improve performance and shorten system reaction time
 - Support latest computer generation
Take full advantage of the latest processor technology and speed.

CoDeSys WizPLC (supports all IEC 61131-3 languages)
 - Compatibility with 60 Automation Alliance PLC manufacturers
 - Soft Logic Application editor fully compliant with IEC 61131-3 standard
 - Comprehensive online functionality
 - Options for retained variables
 - Import of Siemens S5 / S7 PLC projects.

OPC HDA 1.2 Server
 - Wizcon 9.0 delivers historical data via the integrated OPC HDA 1.2 Server
 - Users have the flexibility they need to rapidly adapt to changing information management needs.

Web Technology performance enhancements
 - Net superiority of the Web power of Axeda: super-fast initial application loading, fast loading of online trend, high clock update frequency rate.
These excellent performances were demonstrated during a large benchmark, performed with one hundred real applications worldwide, with exceptional results.

Three new utilities
 - Application upgrade tool: accelerate your application's migration to Wizcon 9.0
 - Image calibration tool: maintain identical image appearance on all stations, regardless of graphic card
 - Automatic error reporting: improved customer support as system constantly monitors and stores system states when issues arise, for easier troubleshooting and faster resolution.

Immediate online assistance (exclusive, patented Axeda technology)
The Axeda Supervisor suite includes an "Access Remote" icon enabling direct, online support for optimal user satisfaction using Axeda Collaborate Service.
With membership in one of Axeda's Customer Service and Support programs (such as Axeda Hotline Plus, Axeda eXpert program, Axeda eXpert Plus, or Axeda VIPartner Program), you get the full benefits of Axeda's integrated online support, based on Axeda DRM technology, and a host of other services from Axeda or its authorized distributors.

Our objective:
Help you develop your automation applications easily and faster, and avoid IT support and system maintenance.
